SUMMARY

Full-stack Software Engineer with 2.5+ years building scalable backend systems and modern web applications. Expertise in Java/Spring Boot microservices, React, and cloud infrastructure. Proven track record delivering AI-powered automation (\$4M revenue impact) and high-volume transaction systems (50K+ daily).

SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL
Backend: Spring Boot, Node.js, Express.js, REST APIs, Microservices, Kafka, GraphQL
Frontend: React, Redux, Angular, HTML/CSS
Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis
Cloud & DevOps: AWS, Docker, Jenkins, Kubernetes, CI/CD, Git, GitHub, Spinnaker
Tools & Technologies: Apache Solr, NGINX, JWT, Apache Nutch, Postman, Agile/Scrum

EXPERIENCE

Copart

Software Engineer

Dallas, Texas

May 2024 - Present

- Built AI-powered document extraction system using Google Gemini that eliminated 120 hours/week of manual data entry and generated \$4M in annual revenue with 97% accuracy
- Architected Kafka based event-driven microservices using Spring Boot for Title Processing system handling 50,000+ daily transactions, reducing processing time by 40%
- Optimized Apache Solr search performance through MySQL indexing and React based faceted filtering, improving query response time by 25%
- Implemented Redis caching and CI/CD pipeline using Jenkins, Docker, and AWS, reducing API latency by 40% and enabling daily releases with automated testing

Deloitte

Software Engineer

Mumbai, India

May 2022 - August 2023

- Developed Spring Boot payment gateway microservice processing 5,000+ daily transactions with OAuth 2.0 and RBAC, reducing security incidents by 35% while achieving PCI compliance
- Automated financial transaction processing for 10,000+ monthly operations using SQL stored procedures and triggers, cutting manual effort by 30% and reducing errors from 5% to under 1%
- Spearheaded IBM FileNet adoption across 4 teams through training and documentation, streamlining workflows that saved 800+ hours annually and reduced approval cycles by 20%

PROJECTS

Domain-Specific Search Engine

Fall 2024

- Led 3-person team building specialized search engine indexing 124,000+ web pages using Apache Nutch and Solr, achieving 89% ranking accuracy compared with Google and Bing.
- Deployed PageRank, HITS, and K-means clustering algorithms with TF-IDF scoring, boosting search precision by 30% while maintaining sub-200ms response times

Custom Relational Database (DavisBase)

Spring 2025

- Created RDBMS from scratch in Java with SQL parser, B+ Tree indexing, and query planner, achieving 92% MySQL syntax compatibility
- Engineered page-based storage engine with buffer pool management and ACID compliance, accelerating query execution speed by 25%

EDUCATION

University of Texas at Dallas, Texas

Master of Science, Computer Science

August 2023 - May 2025

CGPA - 3.89/4.0

University of Mumbai, India

Bachelor of Technology, Computer Science

August 2018 - May 2022

CGPA - 3.82/4.0

LEADERSHIP

Teaching Assistant, CS3305 | University of Texas at Dallas

August 2023 - May 2024

Conducted weekly office hours for 60+ students in discrete mathematics and programming, clarifying algorithmic concepts, debugging code, and grading 200+ assignments per semester with detailed feedback
